**Section 5 Fire - fighting measures**

**Suitable extinguishing media** Dry powder or carbon dioxide. Water may be ineffective. In case of exothermic decomposition and appearance of smoke, water should be used to suppress it.

**Extinguishing media not to be Used.** Do not use dry chemical extinguisher containing ammonia compounds.

**Unusual fire and explosion Hazards** Forms explosive mixtures with combustible, organic or other easily oxidizable materials. When heated to decomposition, may release poisonous and corrosive fumes. Dust may form a weak explosive mixture with air (class St1), but is not sensitive to ignition from electrostatic discharges.

**Fire fighting procedure** Cool containers with water spray. In closed stores, provide fire-fighters with self-contained breathing apparatus in positive pressure mode.

**Section 6 Accidental release measures**

**Personal precautions** Evacuate area. Use respirator with combined filter (inorganic gas and dust), gloves, chemical safety goggles and body covering clothes. If material is decomposing, use self-contained breathing apparatus and a fully encapsulated suit.

**Methods for cleaning up** Sweep up, place in a suitable container and hold for waste disposal. Avoid raising dust. Ventilate area and wash spill site after material pickup is complete.

**Environmental precautions** Prevent entry into sewers and watercourses

**Section 7 Handling and storage**

**Handling** Keep containers tightly closed.

**Storage** Keep away from all sources of ignition. Recommended storage temperature below 30°C. For transportation purposes it is possible to store at temperatures up to 50°C. Store in a dry, well-ventilated area. Store away from incompatible materials (see "materials to avoid").

**Section 8 Exposure controls / personal protection**
