

Critical Usage Information

ClearView Super Crystal Clarifier

CLEARVIEW™ CRYSTAL CLARIFIER is specially formulated to surround even the smallest particles or organic waste and other contaminants to aid in filtration. This product will make water exceptionally clear, brilliant and sparkling and lower operating costs. Compatible with all treatment systems.

DIRECTIONS:

FOR INITIAL TREATMENT: Add 7 ounces per 10,000 gallons of pool water following backwash or filter cleaning. Brush pool if necessary and run pump until pool is clear. Backwash or clean filter when pressure reaches manufacturer's recommended level. Continue regular filter cycle.

FOR WEEKLY MAINTENANCE: During warm months, add 1/2 ounce per week per 5,000 gallons of water of pool water to aid in keeping pool water clear of contaminants.

FOR OFF-SEASON MAINTENANCE: Add 1/2 ounce per 2,500 gallons of pool water per week during the fall and spring. Increase treatment to WEEKLY MAINTENANCE routine (as indicated above) when water temperature warms to 68°F/20°C or higher.
