

Critical Usage Information

ClearView Phos-Boss

The following is only the basic usage directions. Refer to the actual product label for First Aid, Warnings and other statements of use.

Phosphates are known to be the primary cause for algae growth. Maintaining a phosphate level below 100 ppb, eliminates any need for algaecide. Test phosphates monthly for best results

DIRECTIONS:

1. Kill off existing algae before starting Phos-Boss Phosphate Remover treatment.
2. Balance pH between 7.4 - 7.6.
3. Clean or backwash filter if needed.
4. Raise chlorine levels to 3 - 5 ppm.
5. Follow dosage of Phos-Boss Phosphate Remover on the chart below.
6. Make sure to shake bottle well and add to the skimmer with filter running.
7. Run filter continuously for 48 hours without backwashing or cleaning filter. After 48 hours, backwash and clean filter.
8. Once phosphate levels drop below 100 ppb, start weekly maintenance of 1 cup per 15,000 gallons and 2 cups after backwashing or cleaning filter.

Dosing Chart for 15,000 gallons to remove phosphate in parts per billion.

500 or Less	- .5 Quart
500 – 1000	- 1 Quart
1000 – 1500	- 1.5 Quart
