ClearView Poly Power 30 Algaecide

ACTIVE INGREDIENT: Poly [oxyethylene (dimethyliminio) ethylene (dimethyliminio) ethylene dichloride] - 30%, OTHER: - 70%

The following is only the basic usage directions. Refer to the actual product label for First Aid, Warnings and other statements of use.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
This product is used to control the growth of algae in swimming pools, heated swimming pools, exterior whirlpools, hot baths, and decorative fountains.

SWIMMING POOLS, HEATED SWIMMING POOLS, EXTERIOR WHIRLPOOLS, AND HOT BATHS
For maximum effectiveness of this product in swimming pools, heated swimming pools, exterior whirlpools, and hot baths, those with heavy growths of algae must be cleaned prior to using this product. For pools having just visible algae growth, add an initial dose of 13-24 fluid ounces of this product per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool, add initially 12-22 fluid ounces of this product per 10,000 gallons of water. To maintain pools free of visible algae growth, subsequent additions of 4-8 fluid ounces of this product per 10,000 gallons of water must be made every 5-7 days after the initial treatment.

Uniform distribution of this product throughout the water in the pool is necessary for maximum effectiveness. This product is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. This product can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix this product with concentrated dry or liquid chlorine products.

For spas, whirlpools or hot tubs, use an initial dose of 0.5 to 12 fluid ounces per 1,000 gallons of water. For subsequent additions, add 0.2 to 9 fluid ounces per 1,000 gallons of water every 5 to 7 days after initial treatment for maintenance.
