

Critical Usage Information

Clear Spa 104 Spa Phos

The following is only basic usage directions. Refer to the actual product label for First Aid, Warnings and other statements of use.

Spa Phos (Phosphate Remover)

Phosphates are known to be the primary cause for algae growth. Maintaining a phosphate level below 100 ppb, eliminates any need for algaecide. Test phosphates monthly for best results.

DIRECTIONS:

Kill off existing algae before starting with Spa Phos Phosphate Remover treatment.

1. Balance pH between 7.4 - 7.6.
2. Clean or backwash filter if needed.
3. Adjust the spa sanitizer. Bromine levels of 8 ppm or less. Chlorine levels of 5 ppm or less. For safe reentry into chlorine spas, 4 ppm is recommended.
4. Follow dosage of Spa Phos on the chart below.
5. Make sure to shake bottle well and add to the skimmer with filter running.
6. Run filter continuously for 48 hours without backwashing or cleaning filter. After 48 hours, backwash and clean filter.

FOR WEEKLY MAINTENANCE

To maintain spas with 500 ppb or less, add 1 teaspoon of Spa Phos per 300 gallons.

HANDLING & STORAGE

Spa Phos is inherently stable with an indefinite shelf life under normal temperatures less than 120 F (48.9 C).

Prevent freezing to avoid container damage and loss of product. Spa Phos Phosphate Remover is non-toxic and non-hazardous. Gloves and appropriate eye protection should be worn when handling the product.

Spa Dosing Chart

Phosphate Removal in Parts Per Billion	Dosage per 300 Gallons of Spa Water
500 or Less	1 Teaspoon
500 – 1000	2 Teaspoons
