

Winter Sleeper Pool Closer

For Chlorine Systems

The Winter Sleeper Pool Closer is a 3 step system that prepares your pool for the cold winter months, protecting the pool and its equipment from damage. A pool that isn't properly prepared for winter can develop severe algae and other water-related problems. The Manufacturer warranties become void if products are not used in accordance with manufacturers instructions and recommendations. Due to uncontrollable weather conditions, these directions are to be used only as a guide. Contact your pool & spa dealer for treatment advice for your particular area.

Winter Sleeper Includes: Shimmer-N Shock Chlorine Formula, Poly Power 30, and Mineral Magnet

Put your pool to sleep for the winter: When water temperatures drop below 68°F in the fall.
And jump start your pool in spring: When water temperatures rise to 68°F or higher.

PRECAUTION: NEVER MIX CHEMICALS TOGETHER.
ALWAYS ADD CHEMICALS TO WATER, NEVER WATER TO CHEMICALS.
HANDLE CHEMICALS SAFELY.

INSTRUCTIONS

STEP 1: Prepare Your Pool 48 hours prior to closing.

Ensure that your pool water is properly balanced. Make sure the pool is clean of all dirt, leaves, algae, oil and the skimmer & pump basket are clear of debris. Clean the filter so it will be ready for spring startup. Follow your pool professional's advice for freeze protection.

STEP 2: Add Chemicals per instructions for the 15,000 or 35,000 pool kit.

15,000 Gallon Kit

Add 1lb. Shimmer-N' Shock following label instructions. Circulate water for two or more hours. Add 1qt. Poly Power 30 following label instructions. Circulate water for another two or more hours. Add 1qt. Mineral Magnet following label instructions. Circulate water for another two or more hours.

35,000 Gallon Kit

Add 3 lb. Shimmer-N' Shock following label instructions. Circulate water for two or more hours. Add 1qt. Poly Power 30 following label instructions. Circulate water for another two or more hours. Add 1qt. Mineral Magnet following label instructions. Circulate water for another two or more hours.

STEP 3: Close your pool and contact a dealer near you for recommendations on the proper water level for your pool and if an anti-freeze protection chemical should be used.

DO NOT USE AUTOMOTIVE ANTIFREEZE!

KEEP OUT OF REACH OF CHILDREN
DANGER

SEE INDIVIDUAL CONTAINERS FOR
PRECAUTIONARY AND FIRST AID STATEMENTS

Check your pool on Thanksgiving, New Year's, and Valentine's Day.

If the pool was closed in early fall or if winter has been unusually warm, and there is algae present, contact your pool & spa dealer for treatment advice.
